## User-Connected Services

AI WorkPlace enables customers and their authorised users to connect their own third-party accounts to enhance functionality. When users choose to connect these services, they authenticate directly with the third-party provider using their own credentials. AI WorkPlace acts as a conduit for these connections and processes data in accordance with user instructions:

- **Microsoft Azure Services** - Users may connect their Azure credentials to enable Azure-based integrations and data sources
- **Google Workspace** - Users may connect their Google credentials to enable Google Drive, Gmail, and other Google service integrations

When users connect these services, the processing of their data through these integrations is subject to both this Sub-Processors disclosure and the respective third-party's privacy policies. Users retain control over these connections and can revoke access at any time through their AI WorkPlace account settings.

Additional user-connected services may be added as AI WorkPlace expands integration capabilities. Customers will be notified of new integration options in accordance with the Data Processing Addendum.

*Note:* AI WorkPlace will provide notice of changes to this Sub-Processors list in accordance with Section 5 of the Data Processing Addendum.
